Profile Summary

Aspiring Computer Science student (CGPA-6.52) with strong foundations in cybersecurity, web development, and object-oriented programming. Experienced in real-world internships and hands-on projects involving Python and secure software development. Passionate about digital forensics, AI tools, and modern cybersecurity solutions. Actively pursuing certifications and opportunities to strengthen skills in threat detection and cyber defense.

Education

Vellore Institute of Technology Bhopal

B.Tech in Computer Science (cybersecurity and digital forensics) (CGPA - 6.52)

Sep 2023 – Present

Bhopal, Madhya Pradesh

Sunbeam School Varuna (CBSE)

Senior Secondary - Class 12th (Percentage-63)

Mar 2022 - July 2023

Varanasi, Uttar Pradesh

Sunbeam School Varuna (CBSE)

Secondary - Class 10th (Percentage - 92)

Mar 2020 – June 2021

Varanasi, Uttar Pradesh

Internships / Experience

Prodigy Infotech

June 2024 – July 2024

Cybersecurity Intern

Virtual

- Gained hands-on experience in network security, penetration testing, and incident response
- Applied theoretical knowledge to real-world scenarios to enhance threat detection and prevention skills.

CODESOFT

January 2024 - february 2024

Cybersecurity Intern

Remote

- Focused on C++ programming, data structures, and object-oriented principles
- Collaborated on software development methodologies and team-based problem-solving

Projects

CyberSec – AI-Powered Cybersecurity Chatbot | Python, HTML, Flask

Aug 2025 – Present

- Developed an intelligent chatbot to answer cybersecurity-related queries.
- Used Flask, HTML/CSS, Bootstrap, and Gemini for implementation.

PassGuardian – Password Strength Checker | Python

- Created a real-time tool to evaluate password strength and promote strong credential hygiene.

Stegavision – AI-Powered Forensics Tool | Python

- Designed an advanced tool to extract hidden images from videos without compression. - Built with Python and Tkinter for digital forensic applications. Implemented a dynamic front-end with an interactive seat selection interface and developed a comprehensive REST API for managing bookings and demo payments using Strip.

Technical Skills

Languages: Python, Java, C++, HTML/CSS, SQL

Web Development & Databases: React, Node.js, Express, Flask, FastAPI, MySQL, Redis Tools & Platforms: AWS, Git, GitHub, Supabase, Google Colab, Arduino

Certifications

Security Engineer – Microsoft (Jan 2025) Introduction to Artificial Intelligence – Great Learning (Jan 2023)

Explore Generative AI with Copilot in Bing – Microsoft (Jan 2023)
